

# CLEANERS CHECKLIST

Cleaners should make sure that:

Menstrual bins are available in toilets for employees to dispose used menstrual products. Menstrual bins are covered with lids at all times

Taps and sources of clean water are functional with adequate pressure for washing. Sinks have a functioning drainage system

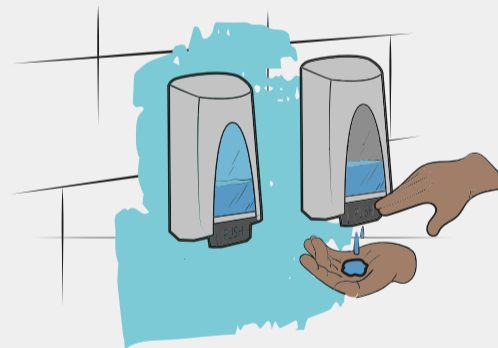

Menstrual waste bins are emptied routinely to avoid overflow of waste

All basins are equipped with functional soap dispensers or clean bar soap

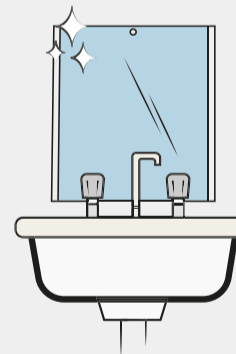

Toilets and floors are clean of all bodily fluids and trash

Soap dispensers are kept adequately full and regularly resupplied with non-diluted soap

Toilets have a functional source of water for flushing and are not blocked by waste or other materials

Each toilet facility has a clean, undamaged mirror

Access to toilets, stalls, and bins is not obstructed or blocked

**NOTE:** Kindly report any complaints about this toilet facility to an MHM Champion or the HR Manager.
